the INKY OCTOPUS

The octopus is most famous for its eight tentacles, in fact the word octopus means 'eight footed'. An octopus trails its eight arms behind it as it swims and uses its massive arms to catch its prey. You could say it must be very handy to have eight arms!

OCTOPUSES ARE RELATED TO GARDEN SNAILS!

VITAL STATS	
Family:	Mollusca
Life span:	Ranges from species to species from 6 months - 5 years.
Largest:	around 4.3 metres
Smallest:	around 1.5 cm
Habitat:	The octopus inhabits many diverse regions of the ocean world-wide including coral reefs and the ocean floor.
Diet:	Carnivore

There are loads more facts about me that make me an original octopus, read on ...

The giant Pacific octopus is often cited as the largest octopus species at 15kg and an arm span of up to 4.3m.

The smallest is the 'Octopus wolf'. They weigh less than 0.035 ounces (1 gram) and measure only 0.6 inches (1.5 cm) in length.
